resource pack

Rainbows Go Wild 2019

This pack is full of ideas to use while at your chosen venue. Everything can be adapted to suit your needs! There are short activities to complete in groups and a series of sheets to use. These are intended to be printed and held by the adults leading small groups. Rainbows might like to fill in parts, but the adult can do most of the writing - leaving the Rainbows free to look, listen and enjoy the experience! The sheets can be used at a later meeting to follow up on the experience too.

All these activities encourage the Rainbows to use their observational and thinking skills. A camera - either digital or on a phone - might be useful to record what you see.

Don't forget, there will also be a song book and game book available for download on the Girlguiding LaSER website for those who want to take it a bit further!

Remember, you will need to fill out a risk assessment form for your trip. Please find a template on the Girlguiding LaSER website [here](#).

Small group activities

These activities are perfect for girls to complete in groups while having a rest, eating lunch or on their way home.

Bingo

Create a bingo card for Rainbows to mark off the animals they have seen. See the book list at the end of this pack for websites where you can access these for free.

Storytelling

Make up an adventure story starring an animal that the girls choose that they saw.

Noises

What noises did the animals you saw make? Pretend to be one and make its noise - can your friends guess which one you are?

Colours and patterns

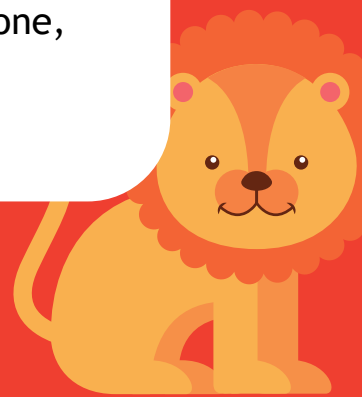

What colours were the animals and what patterns did they have? Why do you think they look like this? Does their pattern or colour help them? Draw one.

Food

Did you get to feed any of the animals? What did it feel like? How did it make you feel? What do the animals eat? Do you like to eat any of the same foods?

Pets

Wild animals don't make good pets, but if you could have one, which one would you like? Draw it and say why.

Venue activity
sheets

Creature Feature

All living things need certain things to survive.
Choose an animal to explore what they need.

Food

Water

Shelter

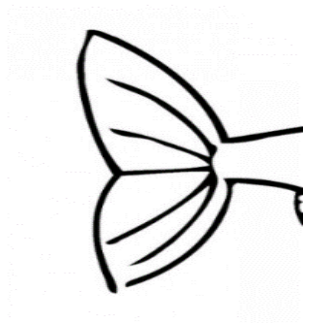

Environment

Rainbows could use cameras to record what they see.

I like to move it, move it!

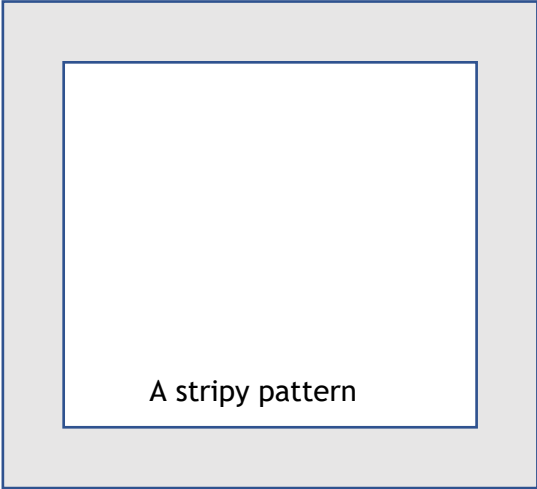

Which of these body parts have you spotted?

Rainbows could use cameras to record what they see.

Looking for patterns

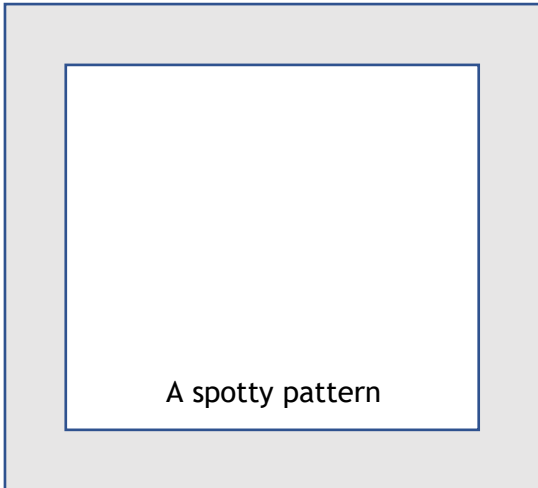

A stripy pattern

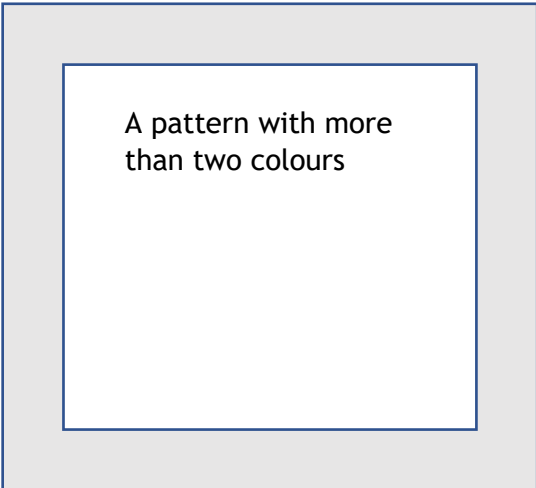

A repeated pattern

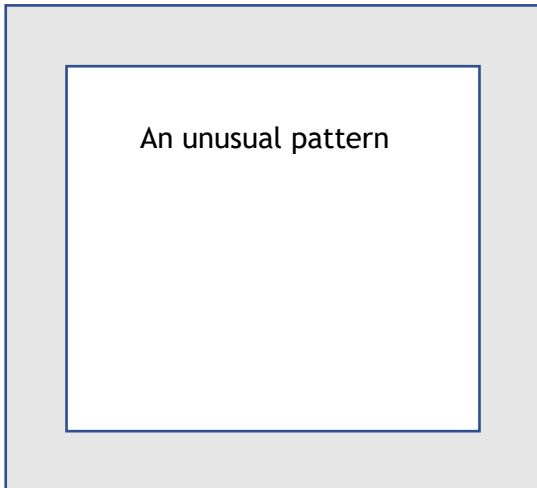

A beautiful pattern

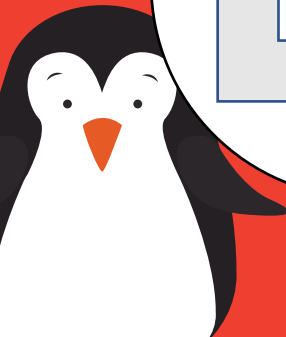

A spotty pattern

A pattern with more than two colours

An unusual pattern

Rainbows could use cameras to record what they see.

The Big Count

How many animals can you see?

1

10

2

More than
20

3

More than
50

4

100s

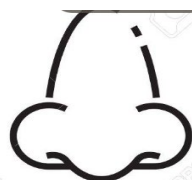

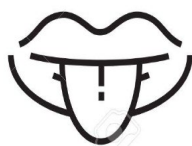

5

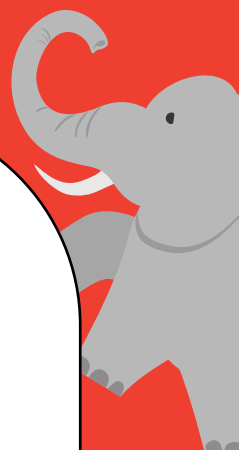

Adults: complete this for your group. Rainbows can help by counting!

Use your senses

What can you see, hear, taste, smell and touch?

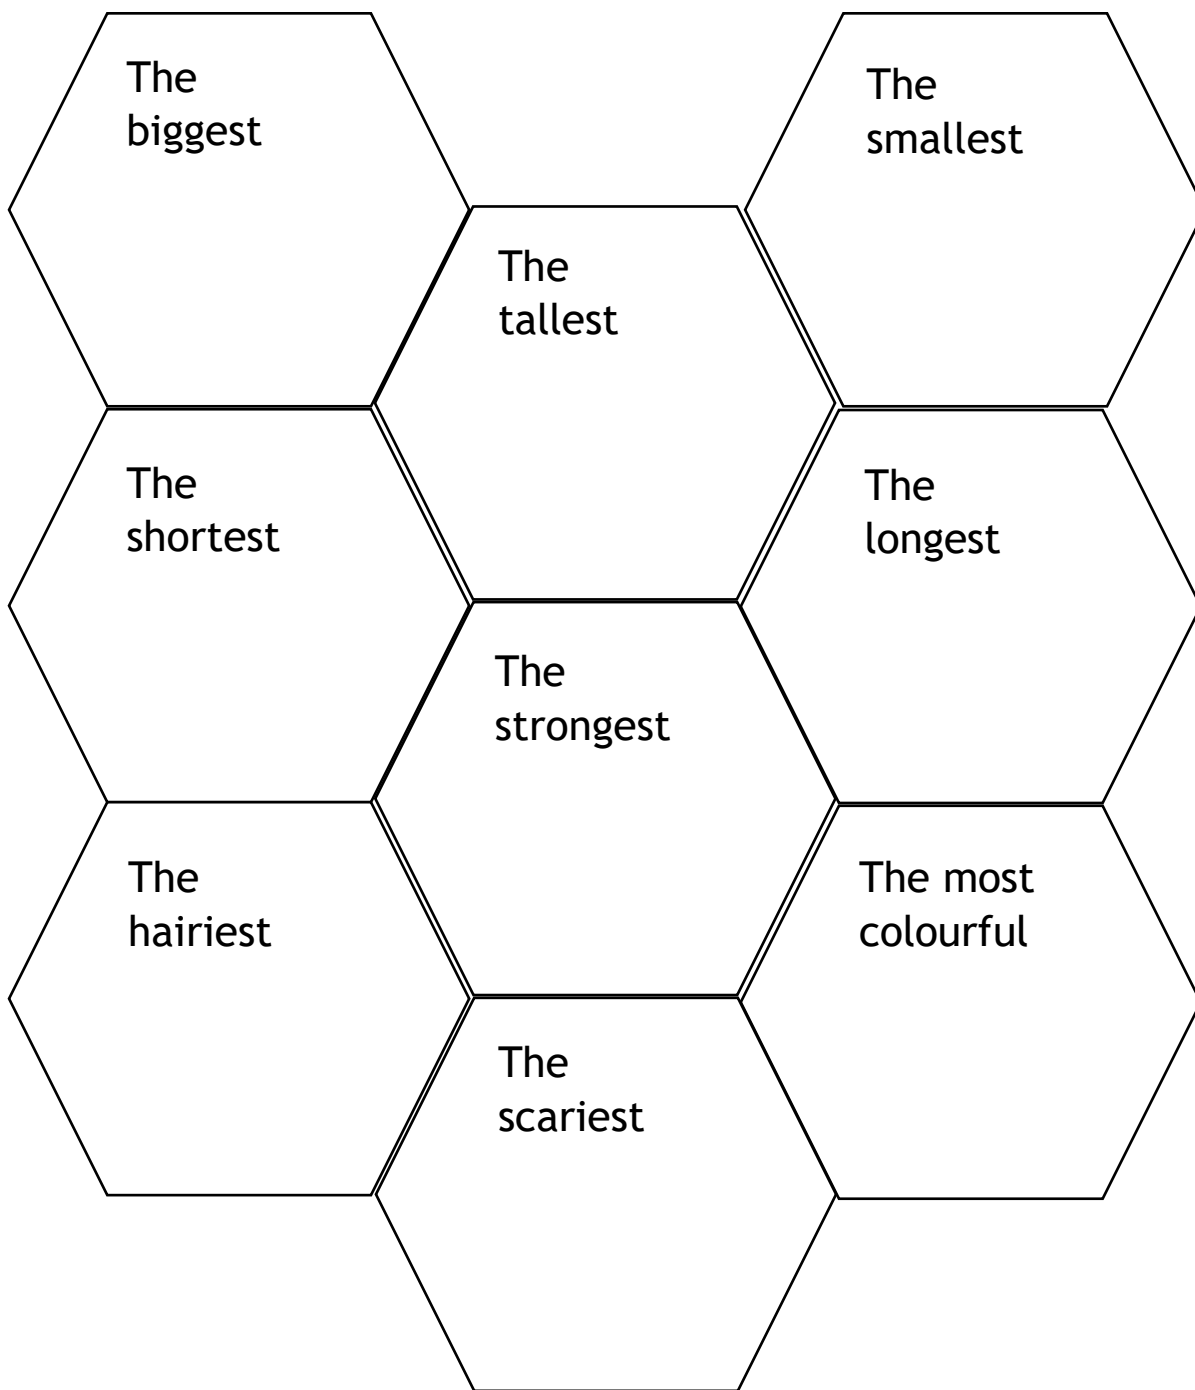

Adults: complete this for your group. Rainbows can help by using their senses
- they will have lots of ideas!

Who measures up?

Which animal is...

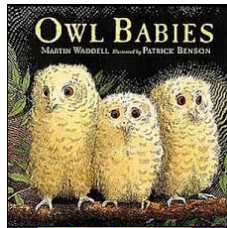

Adults: complete this for your group. Rainbows can help by looking at signs and information sheets.
